- .43 to .60 CFM Per Machine Cycle at 80 PSI (CFM will vary with added options)

Electric Requirement

- 240 Volt - 3 Phase - 60 Hz - 7.5-9 amps (Could vary with added options)

Footprints

- Approx. 74" x 78" - Model 501-36
- Approx. 74" x 82" - Model 501-52
- Approx. 74" x 99" - Model 501-65

Speed

- Up to 30/min depending on product

Package Size

- 2" x 2" - 24" x 65"

The Model 501 Vertical Bagger is one of the largest and most versatile baggers in our lineup, and is engineered to maximize efficiency and reduce packaging costs. By using centerfolded material, it delivers substantial film savings compared to pre-made bags.

This model excels with products that are longer than they are wide—such as stacks of cups, bolts of cloth, curtain rods, and other cylindrical or elongated items—making it an ideal choice for operations looking to improve productivity while lowering material costs.
