

Rennco designs and manufactures semi-automatic and fully automated vertical bagging systems for a broad range of product lines. Rennco's vertical arrangement offers a better solution for hard to handle and oddly shaped items that are difficult to handle on horizontal type systems. Rennco offers customized infeed and outfeed solutions for a complete automated packaging line, and provides solutions for a wide variety of industries including Food Service Disposables, E-Commerce, and Commercial Laundry.

Rennco is a product brand of ProMach, a global leader in packaging line solutions. As part of the ProMach Robotics & End of Line business line, Rennco helps our packaging customers protect their reputation and grow the trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Rennco at www.Rennco.com and more about ProMach at www.ProMachBuilt.com.

TECHNICAL SUPPORT AND SERVICE

Ensuring All Production Expectations Are Met

- **Installation and Start Up of New Equipment.** Experienced Rennco technicians provide assistance in setting up and testing in your plant to ensure all production expectations are met.
- **PMMI Certified Training.** We train your personnel in your plant on your equipment
- **Follow-Up Training.** Our technicians are available any time after the initial installation for follow-up training for new employees or to provide new information and techniques.
- **Machine Repair and Service.** Rennco technicians provide timely repair assistance and general machine service. They offer equipment evaluations, assistance in achieving maximum production rates, and recommendations for upgrades and maintenance schedules.
- **Refurbishing Packagers or Entire Systems.** Cost effective and warranted factory refurbishing is available for most Rennco equipment.

AFTER-MARKET CUSTOMER SERVICES

- **Competent Phone Service.** Trouble shooting support for everything from mechanical adjustments to electrical controls, PLC programming, and recommended maintenance. Contact us at 800-701-1343.
- **Parts Sales.** Rennco takes pride in our responsive and supportive parts department. Most orders are shipped the same day and arrive at your door the next day, if required.
- **After Hours Support.** Call 517-449-8901 after 5 p.m. ET to speak with a service technician.

PACKAGING SOLUTIONS FOR THE LAUNDRY INDUSTRY

PACKAGING SOLUTIONS FOR OVER 40 YEARS

Rennco manufactures a full line of vertical packaging machinery and automated systems that create flexible packages and bags to suit your products and needs. Since 1969, companies around the world have depended on Rennco's bagging solutions to package a wide variety of products. Rennco's fast, easy-to-use form, fill, and seal systems produce packages without the high cost of using pre-made bags.

SAMPLE APPLICATIONS:

- Bar Towels
- Shop Rags
- Garments
- Wash Cloths
- Hand Towels
- Knit Sheets
- Hospital Gowns
- Towel Sets
- Sheet Sets

Hand-Load Linen Bagger

Packaging solutions designed to meet your needs and product requirements

THE RENNCO ADVANTAGE

VERSATILE, RELIABLE, COST-EFFECTIVE AUTOMATION

Rennco's versatile machines deliver year-after-year reliability and value that simply can not be matched by other vertical baggers or options using pre-made bags.

- **Experience.** More than 5,000 packaging equipment solutions delivered to more than 1,400 customers in 47 countries.
- **Expertise.** Rennco engineering and technical support team excels at solving packaging challenges.
- **Support.** One of the leading reasons for Rennco's many repeat customers. Rennco stands behind every solution with courteous, responsive customer service and a full range of aftermarket parts and services. As part of ProMach, one of the world's largest packaging equipment manufacturers, Rennco offers the strength and resources of a global leader.
- **Reliability.** Heavy-duty construction and design provides reliable service 24/7, year after year.
- **Innovation.** Rennco's innovative low energy, constant-coated seal system delivers package sealing with minimal material buildup. The uptime seal-jaw assembly allows precise, tool-free adjustments for consistent repositioning and enhanced performance.
- **Value.** Small footprint, high efficiency, and savings on material cost over pre-made bags provide years of value and low total cost of ownership.

WEIGH BAGGER

The Rennco Weigh Bagger system incorporates the standard Hand-Load system with a weigh scale where linens are bagged by weight versus by count.

FEATURES & BENEFITS

- Highly Accurate Scale
- Simple, Fast, & Efficient
- Bags Up To 24" x 36"
- Servo Adjustable Bag Tapper
- Ideal For Bagging:
 - Hospital Fitted Sheets
 - ISO Gowns
 - Wash Cloths
 - Bar Wipes

LITTLE BUDDY BAGGER

Designed to handle oversized linens and garments that don't fit with our other automation options, the Little Buddy replaces standard T-shirt bag holders.

FEATURES & BENEFITS

- Highly Accurate Scale
- Intuitive HMI
- Small Footprint
- Plug & Play Ready
- Easy to Load & Operate
- Portable & Lightweight
- Ergonomic Design
- Track Daily Usage
- Recipe Storage

HAND-LOAD LINEN BAGGER

Rennco's Hand-Load Linen Bagger is designed principally for manual inspection of laundry towels.

Products are fed from an infeed hopper, inspected, counted through a light curtain, and bagged as the operator loads the next batch. Finished bags exit on a discharge conveyor.

Our Hand-Load system also comes in a dual setup with two operator stations and baggers on one frame.

If manual inspection isn't required, consider our faster ProPick or U-Pick automatic systems.

FEATURES & BENEFITS

- Simple, Fast, & Efficient
- Utilizes Centerfolded Film
- 4,000 Towels Per Hour (Single Configuration)
- Bags Up To 18" x 24"
- Ergonomic Operator Station
- User Friendly HMI
- Recipe Storage
- Available in Single or Dual Configurations

PROPICK SYSTEM

The Rennco ProPick system is the premier hands-free towel bagging solution—ideal for packaging washcloths, shop towels, bar wipes, microfiber cloths, and more.

Product is loaded into the hopper by either an overhead sling or cart and transported up an incline conveyor to a flat conveyor equipped with a precision scale. The system moves incrementally, weighing items until the target weight is reached. It then advances the load into the film, seals the package, and discharges it for transport.

FEATURES & BENEFITS

- Simple, fast, efficient, and built to last
- No operator required - "Go Hands Free"
- Bags up to 24" x 27"
- 3-4 bags per minute (single bagger)
- Utilizes centerfolded poly versus expensive pre-made bags
- Variable bag length based on products
- Single or Dual configurations
- Compatible with overhead slings or cart systems

LOW-PROFILE PRO PICK SYSTEM

The Low-Profile ProPick retains the same reliable ProPick platform as the original, with a new low-profile design that eliminates the need for an operator platform, keeping employees' feet on the floor while maintaining the same performance and throughput.

FEATURES & BENEFITS

- "Feet on the Floor" low-profile design
- Single or Dual arrangement
- Simple, fast, efficient, and built to last
- No operator required - "Go Hands Free"
- Bags up to 24" x 27"
- 3-4 bags per minute (single bagger)
- Utilizes centerfolded poly versus expensive pre-made bags
- Variable bag length based on products

Single Low-Profile System

Dual Low-Profile System

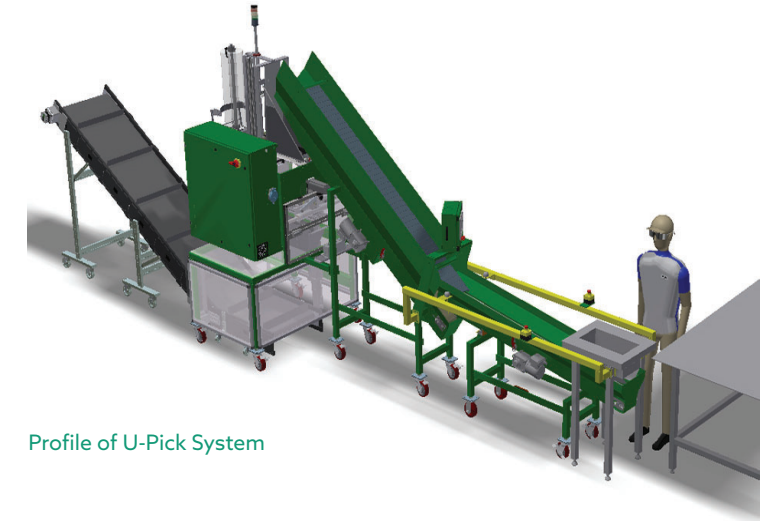

U-PICK SYSTEM

Introducing our latest laundry bagging solution, the U-Pick System — an ideal entry-level option for smaller laundry operations that may not yet require the full capabilities of our flagship ProPick system.

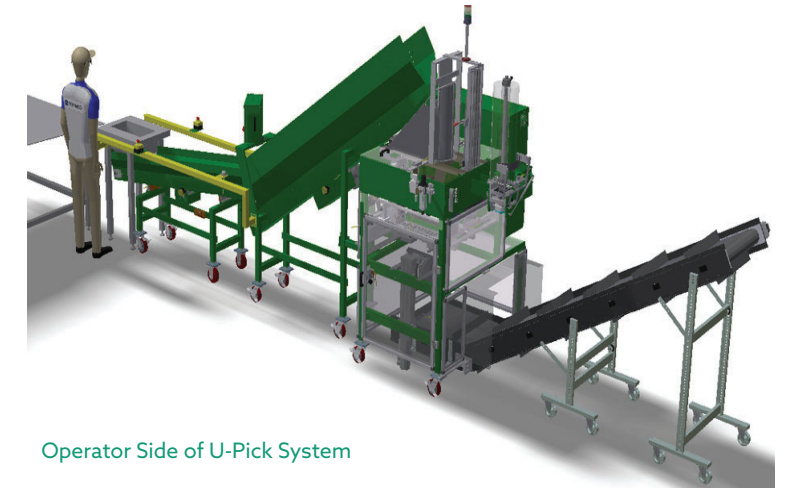

Products are loaded into a weigh bin and automatically released into the packaging unit once the target weight is reached. From there, the product is bagged, sealed, and discharged, ready for final transport.

FEATURES & BENEFITS

- Simple, fast, efficient, and built to last
- Bags up to 30" x 24"
- Up to 3 bags per minute
- Utilizes centerfolded poly versus expensive pre-made bags
- Variable bag length based on products
- Ability to integrate ProPick infeed at later stage
