ROBOTICS &
END OF LINE

> One-of-a-kind precision to ensure packaging lines run with fast, accurate, and reliable heat sealing.

The TruSeal Sealing System is the perfect blend of new technology and Rennco's proven heat-sealing concepts. Born from Rennco's dedication to continuous improvement and voice of customer initiatives, the TruSeal Sealing System capitalizes on ease of use, uptime, and reliability.

Its new technology provides a square or "true" sealing environment, perfectly executing proper alignment while giving the operator an easy and straightforward process that eliminates guesswork.

This new technology produces a quality, attractive product that serves as an appealing retail bag.

FEATURES AND BENEFITS

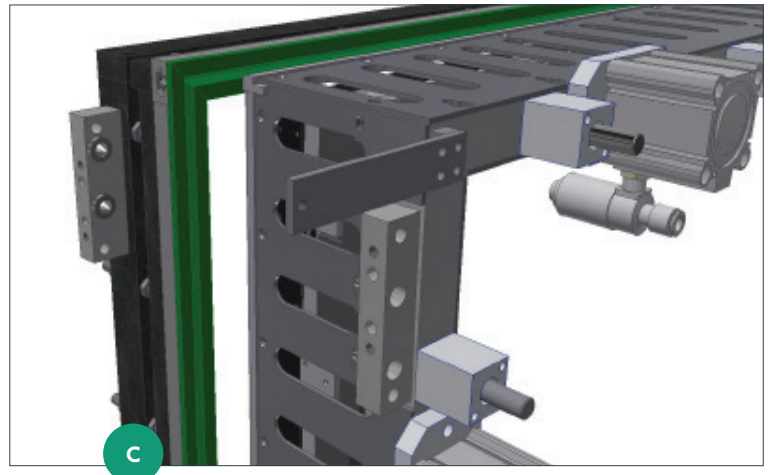

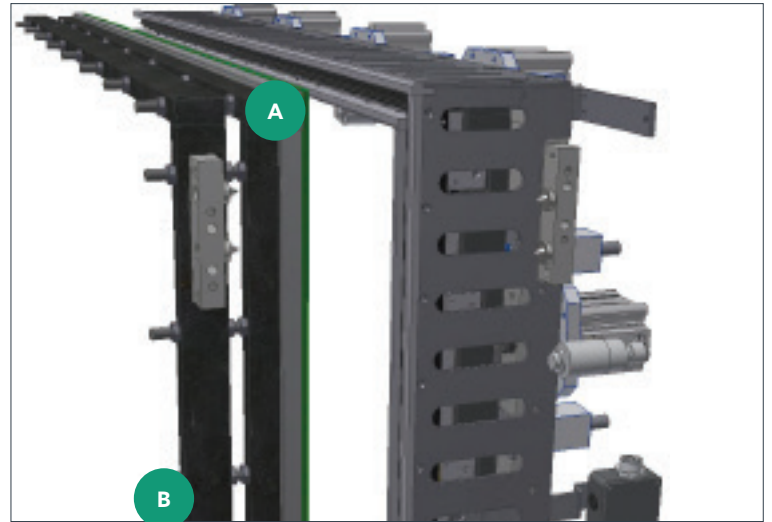

- Easier to adjust and set up – routine maintenance that used to take 30-45 minutes to perform can now be done in 10 minutes or less, resulting in less downtime and increased throughput
- Dependable, delivering long-lasting operation – frequency of purchasing spare parts is reduced saving cost and reducing downtime
- Ideal for e-commerce – provides secure accurate sealing with an easy-to-use operation
- Produces a quality, attractive product that serves as an appealing retail bag.
- Available on new equipment or as an upgrade to existing equipment

A. Rennco's strict machining and design practices assure a truly square solid jaw, creating a trusted profile for proper alignment of sealing edges.

B. Threaded joints allow a technician quick access to adjust pressures for various types of films and load capacities. Using standard tooling, the technician is readily equipped for fine adjustments during scheduled product changeovers.

C. Open edged extrusion allows for ease of maintenance in replacing the newly configured and upgraded Solid Jaw rubber. Maintenance technicians have no need worrying about proper distribution of traditional seal jaw rubber within the extruded channel any longer with Rennco's proprietary design, the Rennco TV001 V Cut Rubber.

The Rennco TV001 V Cut Rubber engages perfectly with the TruSeal-Seal bar technology for reduced energy consumption and increased strength in seal. Rennco's TruSeal Jaw is uncompromising by design!
